Papers****Protest Matters: The Effects of Protests on Economic Redistribution** (with Belinda Archibong, Evans Osabuohien and Tom Moerenhout). Reject and Resubmit, *Review of Economics and Statistics* [NBER working paper, 2026].**Abstract:** Can citizen-led protests lead to meaningful economic redistribution? We study the effects of protests on fiscal redistribution using evidence from Nigeria. We digitized twenty-six years of public finance data from 1988 to 2016 to examine the effects of protests on intergovernmental transfers. We find that protests increase transfers to protesting regions, but only in areas that are politically aligned with disbursing governments. Two natural experiments- the large-scale 2012 Occupy Nigeria protests and 2015 presidential election- validate these results. Protesters also face increased police violence, particularly in non-aligned regions. The results show that protests can influence fiscal redistribution.**The Origins of Women's Economic and Political Participation in Africa.** [Draft available upon request].

Abstract: I use differences in women's historical participation in agriculture to explain the heterogeneous incidence of female labor force participation across Africa today. In pre-colonial Africa, task composition primarily determined the gendered division of agricultural labor, giving rise to distinctly men's and women's crops. In the absence of plough machinery across the continent, societies considered soil cultivation and reaping men's agricultural tasks and considered sowing and weeding women's agricultural tasks. I test the theory put forth by Esther Boserup which argues that pre-industrial societies requiring fewer men's agricultural tasks increased the demand for female labor, and in societies where men held less of an advantage over women in crop production, men worked very short hours in agriculture which made it possible to adopt a female farming system. The empirical results suggest that women belonging to ethnic groups with an ancestral female farming system exhibit higher labor force participation and household decision-making autonomy, independent of the original economic rationale. Interestingly, the reduced form results suggest that one implication of the gendered division of crops is that ethnic groups in areas more suitable for indigenous women's crops exhibit fewer gender motifs depicting female domesticity, female submission, and male violence in their historical folklore. To explore political implications, I provide preliminary evidence that these women also engage more in informal politics, suggesting that the appropriate role of non-elite women in the economy continues to be negotiated through persisting political participation.

Works in Progress

What's in a Name? Toponyms, Origin Myths and Women's Economic Empowerment in Africa.

Do "female-named" communities reflect a social history that has led to more economic empowerment for women in an area today?

Cultural Festivals and the Persistence of Gender Norms Concerning Women's Work: Evidence from an Encouragement Design in Nigeria.

Do cultural festivals, specifically annual harvest festivals celebrating historically "women's crops", generate the common knowledge necessary for progressive gender norms to be advocated for?

The Effects of Women-Led Protests on Gender Gaps in Political Participation (with Belinda Archibong, Nonso Obikili and Oluseye Ajuwon).

Can protests lead to meaningful changes in political participation, particularly among marginalized groups like women?

Fellowships & Grants

Harvard Weatherhead Center for International Affairs, <i>Dissertation Writing Fellowship</i>	August 2026
Econometric Society Africa Summer School	July 2026
Harvard Weatherhead Center for International Affairs, Mid-dissertation Grant	April 2026
Harvard Weatherhead Center for International Affairs, Pre-dissertation Grant (x2)	April 2026
John C. Hansen & Katherine Vogelheim, Research Grant	January 2026
Harvard Weatherhead Center for International Affairs, GSA Grant (x2)	October 2026
Harvard Center for African Studies, Travel Grant	May 2025
Association for Comparative Economic Studies Summer School (<i>fully funded</i>)	July 2025
Harvard Government Department, Women and Politics Research Grant	April 2025
Harvard Jens Aubrey Westengard Scholarship	May 2024
Forbes 30 Under 30 N. America: Education - Founder, Research in Color Foundation	November 2022
Harvard Weatherhead Center for International Affairs, Summer Language Grant	April 2022
Harvard Graduate School of Arts and Sciences <i>Graduate Prize Fellowship</i>	August 2021
Harvard Department of Government <i>Karl Deutsch Fellowship</i>	August 2021
American Political Science Association <i>Diversity Fellowship</i>	December 2020
Best Overall Performance in the Applied Economics Master's Program, <i>Dean's Award</i>	May 2018
